

With UNI-Complete, we make centimetre accurate surveying easy and affordable for everyone who knows how to use a smartphone.

UNI-GRI

The most universal GNSS receiver. Receiving multi-frequency GPS, Glonass, BeiDou, Galileo, and more to get you a centimeter accurate position FIX with ease.

UNI-Cloud & Support

Gets your data from and to the field in no time. Your universal cloud hub connects to your own tools with the UNI-Cloud API and gives phone & remote support.

UNI-Connect

The most easy surveying software available. Working on any device with a browser and WiFi and letting you survey and stake-out like it's a game.

UNI-RTK Premium

With over 2,250 base stations all over the world, UNI-RTK Premium gets you a mobile data SIM and all the CM accurate correction data you need.

Pole, Tablet & Mount

The basics to get you going: a weatherproof Android tablet, 2-meter survey pole, and mount for the tablet.

Free demo

We offer free (on-site) demonstrations! Send us an email at sales@marxact.com and we'll be in touch!

Survey anything you want

Trees, pipes, roads, markings, cables, and more. In layers with names you like and attributes you need. Store points, lines, or polygons faster than ever before. Everything with centimetre accuracy.

Easy stakeouts

Just tick the point you want to stake-out on the map and follow the directions. Getting close? Aim one circle into another and mark the spot. It's as easy as playing a game!

Your data in local coordinates

Import and export data in your desired format. From complete 3D AutoCAD drawings to all details in a CSV export. In local or global coordinates, directly to and from the office with the UNI-Cloud.

Anyone can survey with centimetre accuracy
